

# Anode Coke Outlook to 2025

---

## Table of Contents

- Executive Summary
- Background
- Methodology and conventions
- Why Petcoke?
- Anode Grade Petroleum Coke Supply
- Petroleum Coke Production
  - Refining Quality Issues
  - Factors Affecting Petcoke Production
- Anode Coke Forecast (ex China)
- Analysis by Country/Region
  - China
    - China Oil Refining and GDP Growth
    - China's Main Companies in Delayed Coking
    - Expected Refinery Expansion
    - Coking Facilities Expected to be Launched by 2025
    - China GPC Forecast
  - North America
  - Latin America
  - Europe
  - Former Soviet Union (FSU)
  - Middle East
- Global Summary of Supply
- Use of Fuel Grade Cokes in the Anode in China
- Global aluminium production
- Aluminium production outlook - comments
- Non-Aluminium Uses of Anode Coke
- Comparing supply and demand
- Base case scenario - Comments
- Base Case and Non-Aluminium Demand
- Allowing for Future Use of Fuel Grade Cokes in China
- Why Haven't We Seen the First Signs of a Looming Shortage?
- Prices Will Start to Respond
- GPC Specifications and Tolerances debate to escalate
- The Role of the International Aluminium Institute
- Real World Versus Mathematical Models
- Implications for Sellers and Consumers of Anode Coke
  - Short-term Reactions
  - Dealing with China
  - Implications for Export Trade
  - Implications for Producers of GPC

- Alternatives to Petcoke
- Price response
- Monitoring the Situation
- Stand-alone DCU
- Non-Aluminium Users of GPC
- Sensitivity Analysis
- China
  - China's Balance of Crude Oil Import Sources.
  - China – Environmental Regulations
  - China's Aluminium Industry Rejects Fuel Grade Cokes
  - China Introduces Hydrocracking Capability
- Common Factors
  - Variations in Yield Factors
  - Variations in the Growth of Aluminium Production
  - Best Case – Worst Case
- Other Coke Production Issues
  - Shift to Low Sulphur Bunker Fuel
  - Coke Handling Issues
  - Heavy Oil Consumption in Japan
  - Other Anode Grade Petroleum Coke Issues
- Conclusion
- Suggested Reading and Bibliography

## List of Figures and Charts

- Figure 1 Typical Coking Refinery Configuration
- Figure 2 Global Fuel Oil Demand
- Figure 3 Delayed Coking Unit schematic
- Figure 4 US Coking Capacity
- Figure 5 Top Ten Coking countries
- Figure 6 Coke Producing Capability - selected Crudes
- Figure 7 US Coke Production per Barrel Coker Charge
- Figure 8 Anode Coke Production 2015 - ex China
- Figure 9 Anode Coke Production History - ex China
- Figure 10 Anode coke production Forecast - ex China
- Figure 11 China Crude Oil Processing and Petcoke Production
- Figure 12 China's Sources of Crude Oil
- Figure 13 Characteristics of selected Crude Oils
- Figure 14 Linear analysis AG GPC
- Figure 15 Linear analysis Fuel grade coke
- Figure 16 Mathematical Model for Petcoke Production
